

# RIDE SAFE

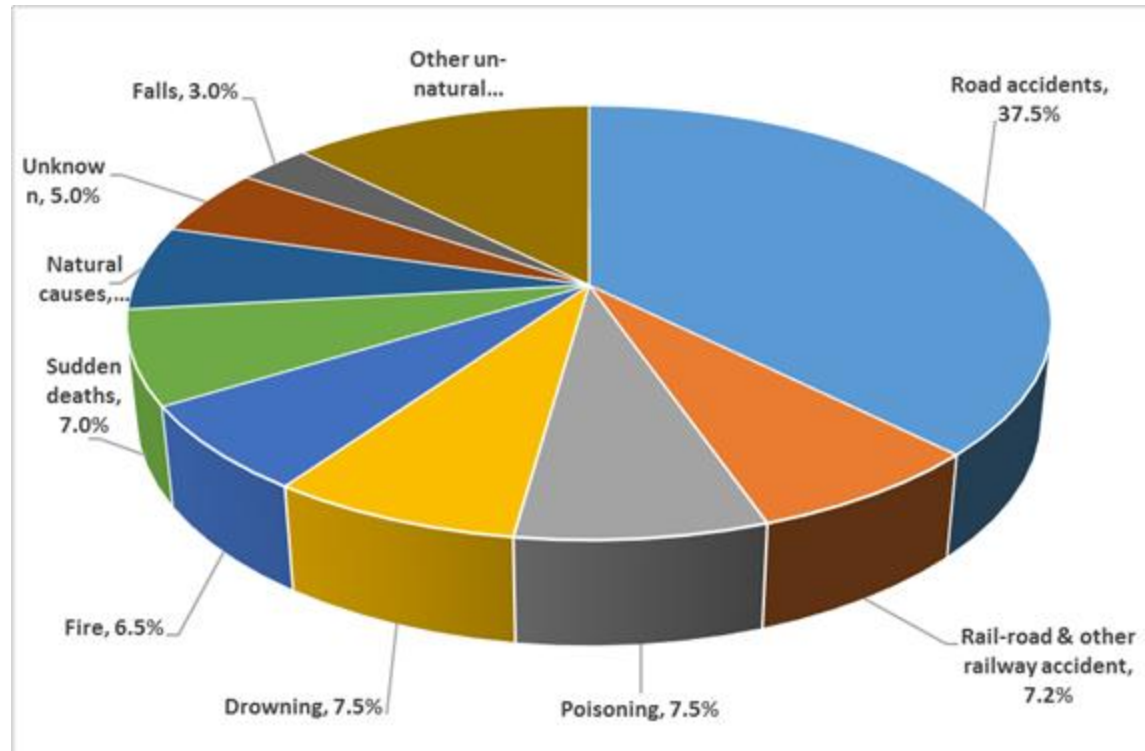

FOR: INDIAN ROAD SAFETY HACKATHON

BY: TEAM BSV (NSIT)

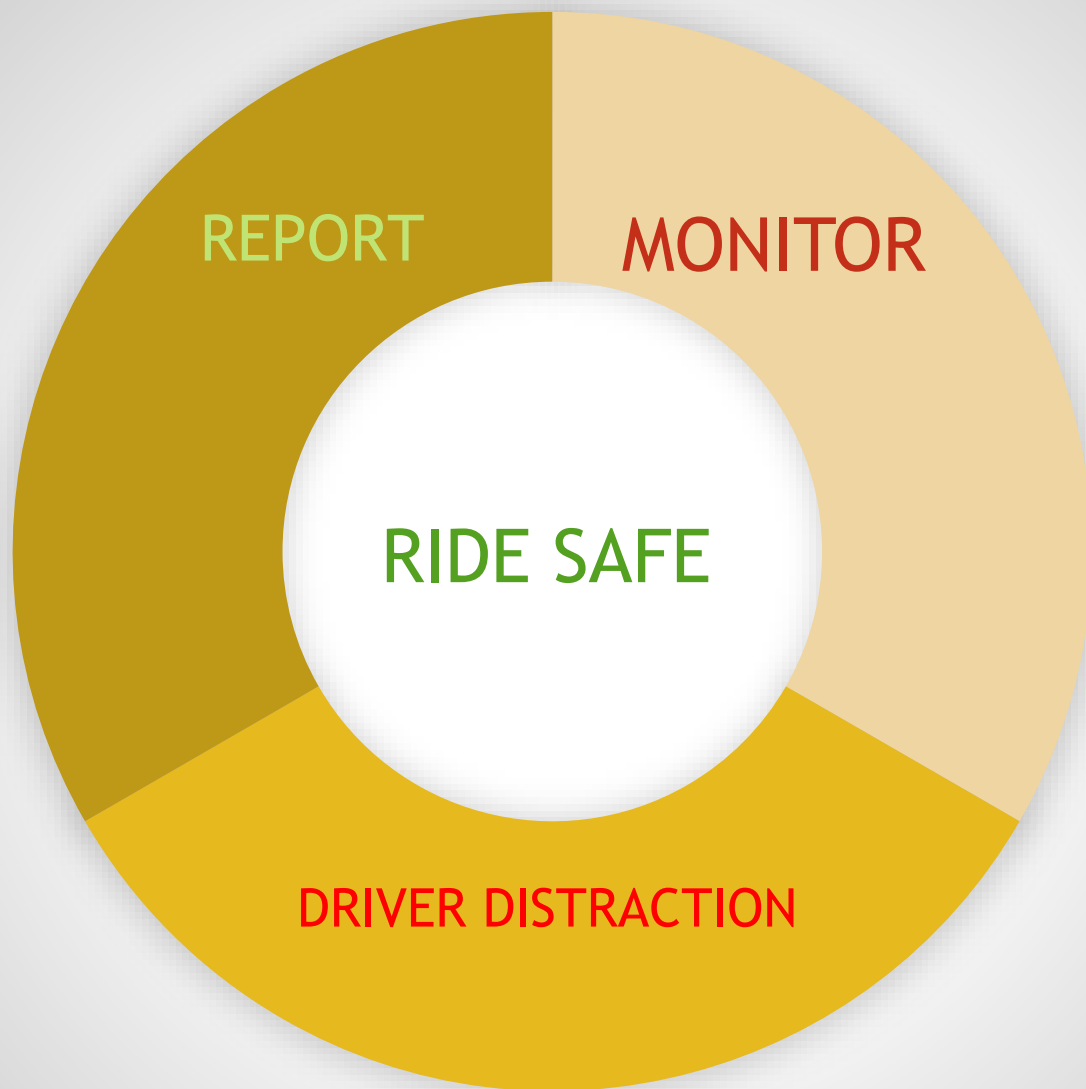

# Increasing Road Accidents ??

# HERE IS RIDE SAFE.....

**RideSafe** provides features to **monitor** driving patterns, **report** traffic violation and monitoring of driving **distractions** of drivers/cabbies by fleet managers/cab hailing companies like Uber,Ola etc to ensure safety of passengers.

Credit points are given for each safe drive to users.

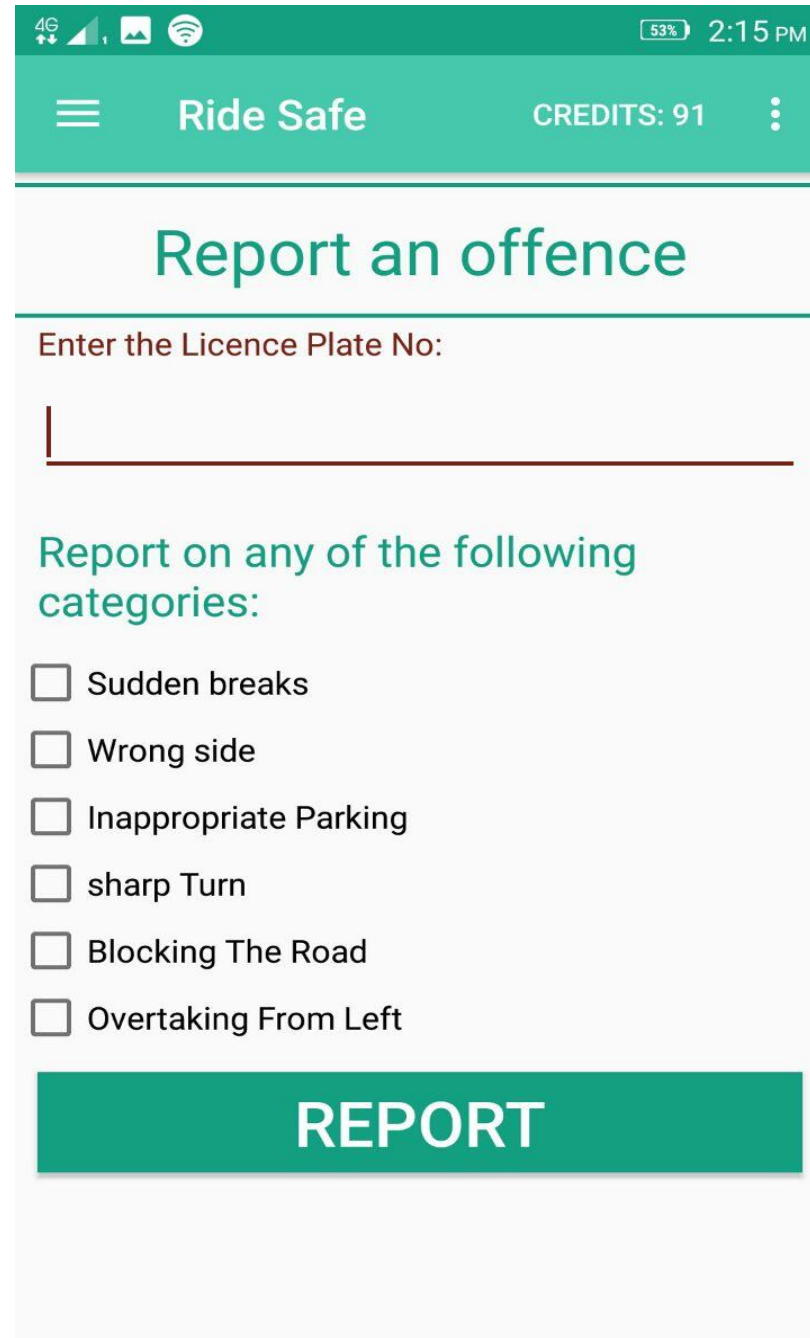

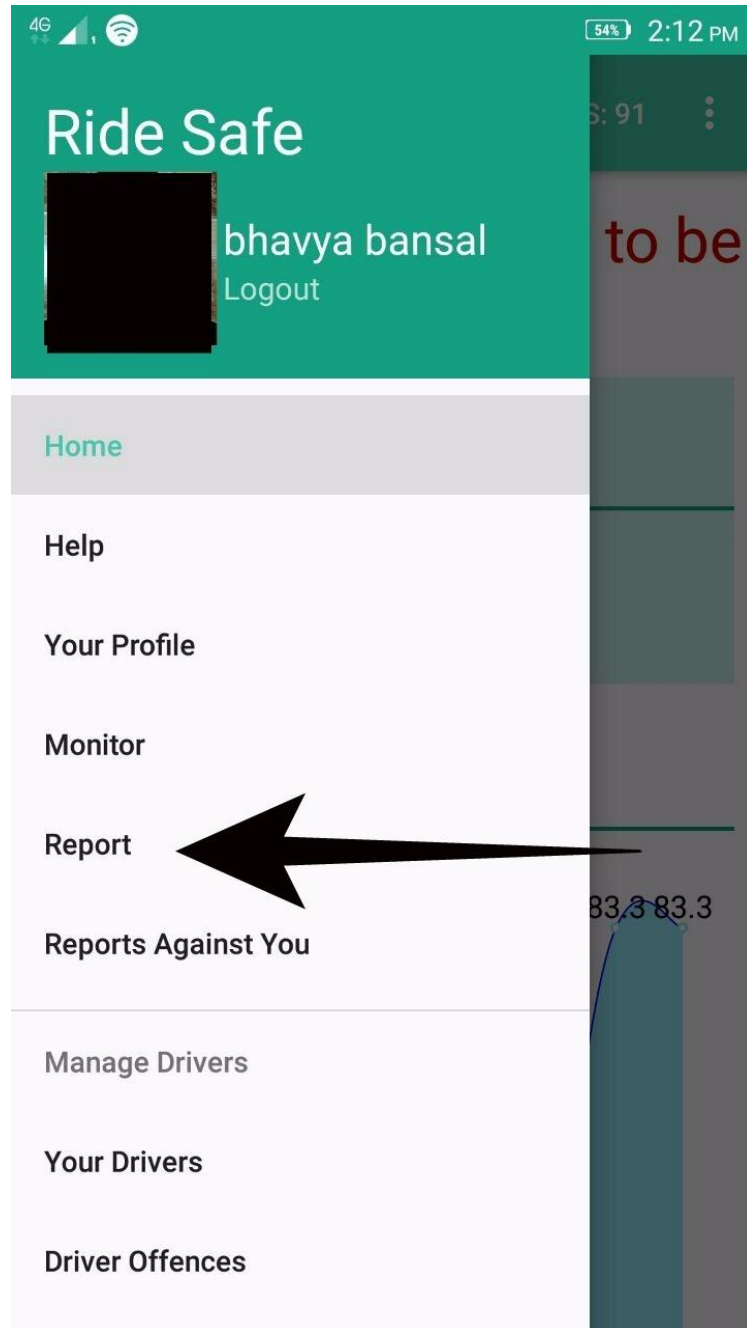

# REPORT

NO POLICE ??

NO PROBLEM,  
JUST REPORT !!

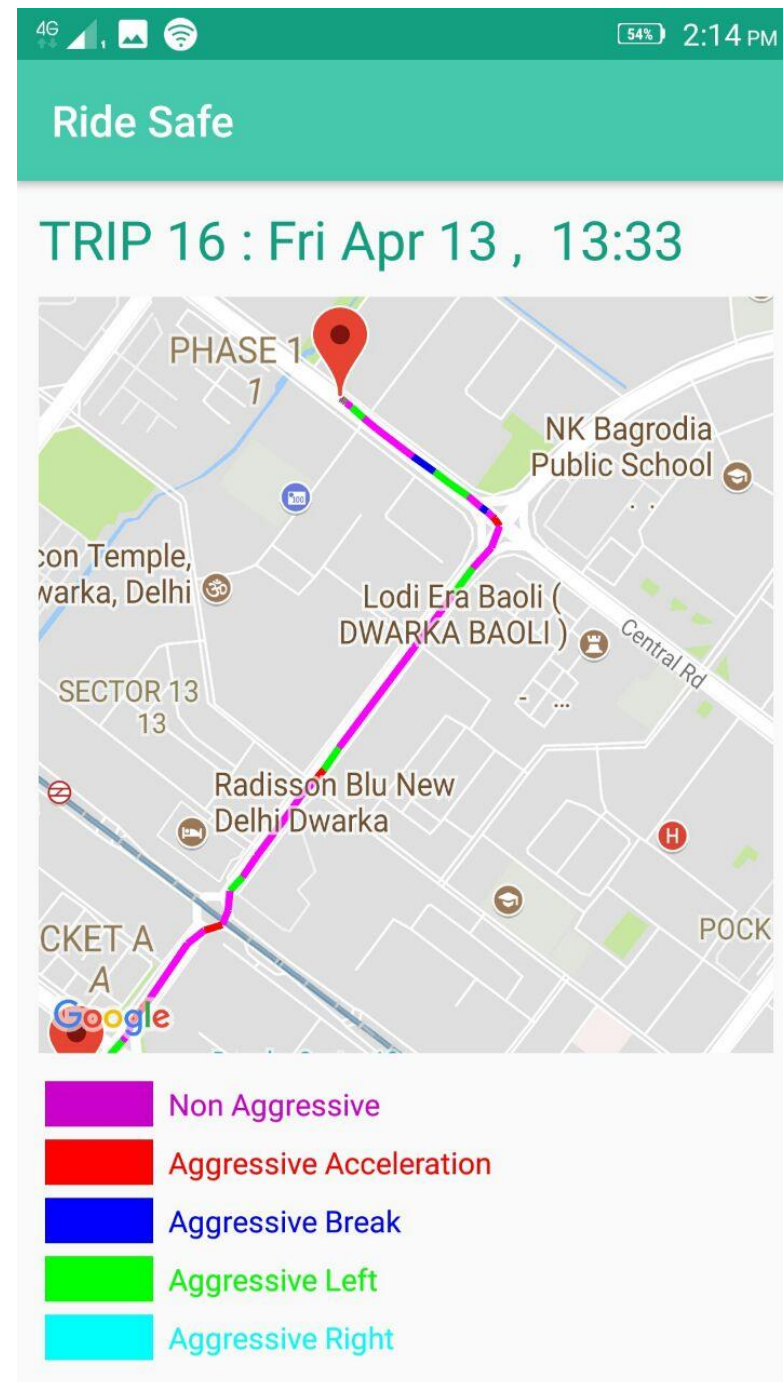

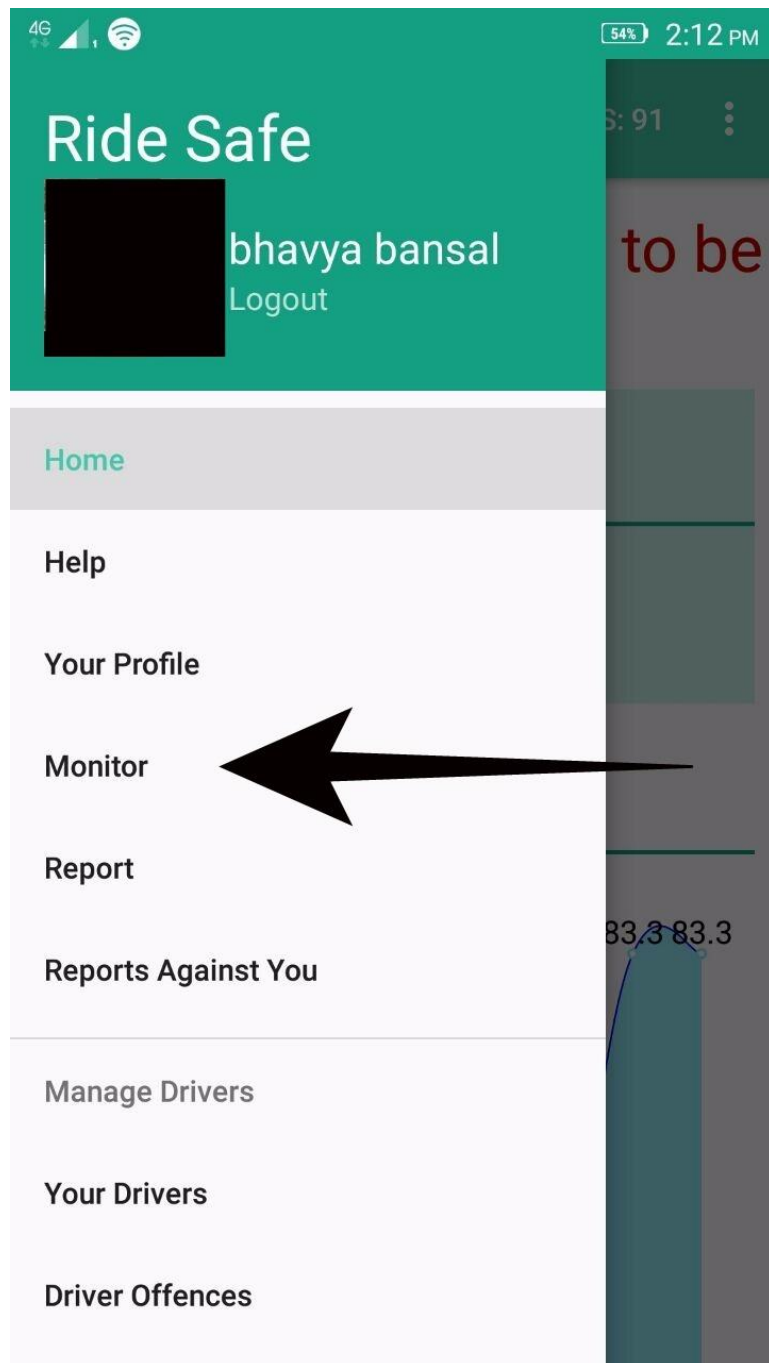

# MONITOR

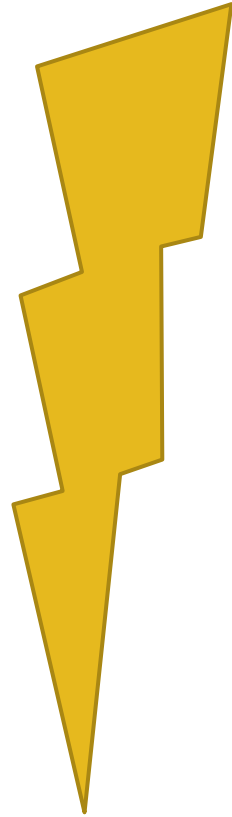

HOW DO I LEARN TO  
DRIVE ???

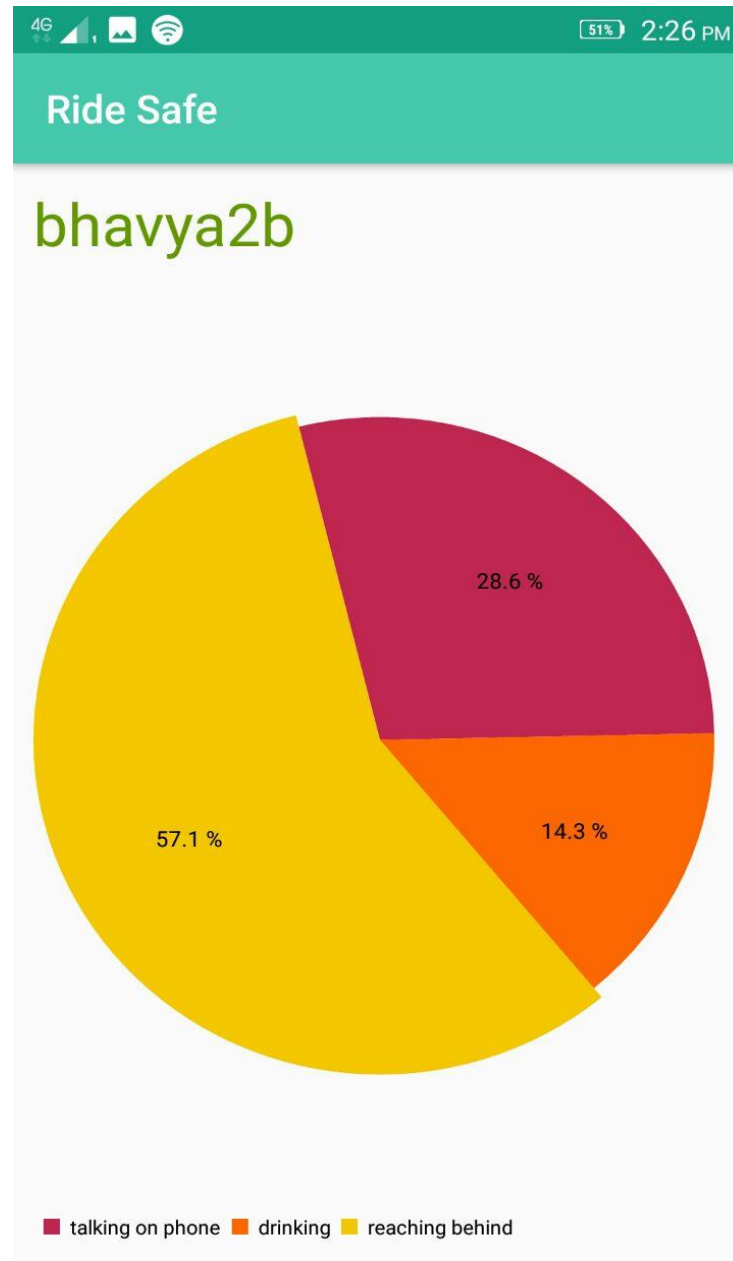

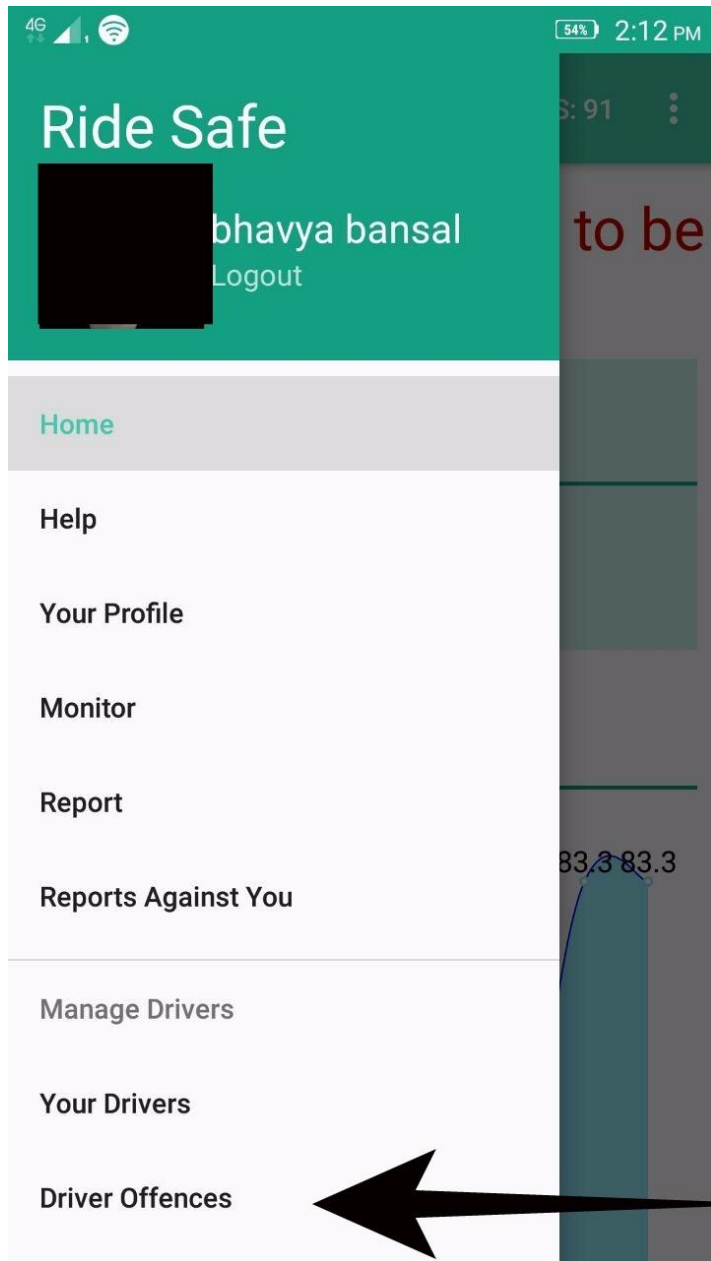

# DRIVER DISTRACTIONS

# FUTURE ENHANCEMENTS

- ☐ We plan on adding a feature to automatically detect if the car is moving so that images and sensor data is only recorded when the car is moving.
- ☐ Monitoring of driving pattern for fleet managers will also be added in the next release.
- ☐ The credit points collected by the user can be used to redeem vouchers on sites like Paytm, Amazon etc.
- ☐ We would also improve our Driving pattern algorithm to work on various terrains.

# THANK YOU
